CARRIER OBJECTIVE

Motivated Computer Science Engineering student (CGPA: 9.22) seeking a Software Developer role. Possesses strong technical expertise in Full-Stack Web Development (Java, Spring Boot, React) and hands-on internship experience. Proven track record with an Elite + Silver NPTEL certification in Java, passionate about building efficient, scalable software solutions.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript
Frontend:	HTML5, CSS3, React
Backend:	Spring Boot, Django
Database:	MySQL, SQLite
Tools:	GitHub, VS Code, Eclipse, Vite, Bootstrap
AI Skills:	AI Prompting

WORK EXPERIENCE

Full Stack Development Intern | *Thiranex Technologies* **May 2026 – May 2026**

- Developed scalable web applications using full-stack development methodologies, integrating frontend user interfaces with robust backend APIs.
- Collaborated on software architecture, version control workflows using GitHub, and database management for optimized query performance.

PROJECTS

Queue Flow 360 - Smart Queue & Appointment Management System

Tech Stack: React, Vite, Bootstrap, Java 21, Spring Boot 3, MySQL

- Designed and deployed a full-stack queue and appointment management system to streamline customer service operations and reduce wait times.
- Implemented secure REST APIs, JWT authentication, role-based access control, and optimized MySQL database operations for high system reliability.

E-Commerce Web Application

Tech Stack: HTML5, CSS3, JavaScript, Python, Django, SQLite

- Developed a feature-rich e-commerce web application featuring dynamic product management and seamless user interaction workflows.
- Implemented backend server logic using Django and configured relational database schemas using SQLite for efficient data persistence.

Java Shopping Cart Application

Tech Stack: Java

- Engineered an object-oriented Java shopping cart application to handle real-time product selection and transaction operations.
- Implemented robust cart state management including dynamic addition, removal, and accurate price calculation logic using Java OOP principles.

Smart Grocery Planner

Tech Stack: HTML5, CSS3, JavaScript

- Designed and built an interactive web application helping users efficiently manage, categorize, and plan grocery purchases.
- Created a responsive, user-friendly interface emphasizing clean client-side state handling and modern CSS design principles.

EDUCATION QUALIFICATION

B.E. in Computer Science and Engineering	2023 – 2027
Shree Venkateshwara Hi-Tech Engineering College, Erode CGPA: 9.22	
HSC (Class XII)	2021 – 2023
Government Higher Secondary School, Gobichettipalayam Percentage: 81%	
SSLC (Class X)	2020 – 2021
Government Higher Secondary School, Gobichettipalayam	

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Online Certification – Programming in Java: Achieved Elite + Silver (88%) (Jan 2026 – Apr 2026).

CO-CURRICULAR ACTIVITIES

- Participated in Startup Lens Hackathon at Selvam College of Technology.
- Presented Weather Application Project at Velammal Institute of Technology.
- Presented technical paper on Quantum Computing at Sengunthar Engineering College.
- Presented paper on AI Prompting at Nandha College of Engineering.
- Attended Game Development Workshop (Unity) conducted by Let’s Game Tech.
- Participated in Design and Analytical Thinking Workshop at Rathinam College of Engineering.
